Welcome to

This site provides [Creative Commons-licensed](#) instructional materials (slides, videos, etc.) for the BBST Testing Course.

We've organized the materials into self-contained sections. Click on the tabs below to view the materials.

- The first sections correspond to [professional development courses](#) taken by software developers. We also use these materials in graduate and undergraduate courses.
- The later sections are currently used only in academic courses. We are currently updating these materials.
- We frequently update the course materials. The named directories ("Foundations", "Test Design", etc.) have different names. NOTE: We will probably move some topics or materials to different directories.

Functional test tools (108 found)

Abbot Java GUI Test Framework

Description:

The Abbot framework provides automated event generation and validation of Java GUI components, improving upon the very rudimentary functions provided by the java.awt.Robot class (A Better 'Bot). The framework may be invoked directly from Java code or accessed without programming through the use of scripts. It is suitable for use both by developers for unit tests and QA for functional testing.

Requirement:

TBC

Download data:

Downloadable files: 93251 total downloads to date

ABI Compliance Checker

Description:

A tool for checking backward binary compatibility of a shared C/C++ library. It analyzes problems: changes in call stack, v-table changes, removed interfaces, etc.

Requirement:

Magnifiant: exploring software testing

Huib's blog on Software Testing

[Home](#) [Links](#) [About me](#)

So you think you can test?

Posted on [August 27, 2011](#) by [huibschoots](#)

I am asked to do a talk at a test consultancy company. To prepare for this talk I want to share my thoughts with you. Hope you can challenge me to rethink or sharpen them.

As a test consultant I have worked for numerous companies and have met or worked with hundreds of testers. A lot of them claim that they are great testers. But are they? I think a lot of testers maybe aren't that great...

Being a great tester takes a lot of practice. I like this ["Becoming a Software Testing Expert"](#)

Quotes on Software Testing

- Words may show a man's wit, but actions his meaning. (Benjamin Franklin)
